MICRO-SAAS & DIGITAL STORE EXECUTION GUIDE

Productized Software & Digital Asset Playbook

STANDALONE ASSET V2.4

1. NICHE VALIDATION & PRODUCT ARCHITECTURE

A. Micro-SaaS Software Tools

Architecture: Next.js / Tailwind CSS Frontend → Supabase DB & Auth → OpenAI / Third-Party API → Lemon Squeezy Billing.
Focus: Laser-focused single-purpose utilities (e.g., automated SEO audit extension, programmatic schema generator, invoice parser).

B. Premium Digital Asset Suites

Architecture: Notion Workspace / Figma Design Kit → Cloudflare R2 Storage → Gumroad / Lemon Squeezy Instant Delivery.
Focus: Turnkey operational templates, curated developer components, or prompt libraries that eliminate hundreds of labor hours.

C. System Validation Matrix (The Problem-Mining Framework)

Validation Protocol: Scour developer subreddits, G2 review complaints, and Twitter/X threads using terms like *"wish there was a tool for"* or *"so tedious to manually"*. Require a minimum threshold of 20 verified user requests before writing code.

2. TARGET BUSINESS METRICS & UNIT ECONOMICS

$49	98%	$0	< 14 Days
AVERAGE ORDER VALUE	GROSS MARGIN	PHYSICAL INVENTORY	MVP DEVELOPMENT

3. PRODUCT PACKAGING & MONITIZATION MODELS

Product Model	Target Customer	Fulfillment Mechanism	Pricing Strategy
Micro Utility SaaS	Freelancers, Developers, Marketers	Instant SaaS Account Provisioning + API Access	$15 - $29 / month recurring
Operating System Kits	Agency Owners, Solopreneurs	Automated Notion Duplicate Link + Private Video Walkthrough	$49 - $149 lifetime purchase
Developer Asset Packs	Indie Hackers, UI/UX Designers	Protected ZIP Download + Cloudflare R2 Expirable Link	$39 - $99 single release

4. AUTOMATED FULFILLMENT & LICENSING PIPELINE

Ensure zero manual intervention post-checkout by setting up a resilient, event-driven webhooks engine.

Fulfillment Sequence:

1. **Checkout Event:** Customer completes purchase on Lemon Squeezy / Gumroad.
2. **Webhook Processing:** Webhook listener validates signature and extracts order payload (`order_id`, `customer_email`, `product_sku`).
3. **License Provisioning:** System auto-generates API key or single-use access link via Supabase / Cloudflare Workers.
4. **Onboarding Dispatch:** Automated email dispatched containing access link, license key, and quickstart video documentation.

5. AUTOMATED TECH ARCHITECTURE FLOWCHART

6. ORGANIC DISTRIBUTION & LAUNCH PLAYBOOK

```
DISTRIBUTION STRATEGY (14-DAY LAUNCH RUNWAY) 1. BUILD IN PUBLIC: Document daily build milestones, metric reveals, and UI iterations on X & LinkedIn. 2. VALUE-FIRST CASE STUDIES: Write zero-fluff breakdowns on Reddit (r/indiehackers, r/SaaS) demonstrating how your tool solves a specific pain point. 3. PRODUCT HUNT LAUNCH: Publish with a 2-minute clean demo video, bulleted feature sets, and a 20% launch discount code. 4. AFFILIATE ENGINE: Offer a 30% recurring commission to micro-influencers and newsletter operators in your target niche.
```

7. LEGAL COMPLIANCE & GLOBAL TAX GUARDRAILS

Merchant of Record (MoR)

Utilize Lemon Squeezy or Gumroad as your MoR to automatically handle global digital sales tax, EU VAT collection, and compliance invoicing without legal liability.

Asset Abuse Protection

Embed dynamic customer identification metadata into generated PDFs/links and use time-expiring Cloudflare R2 presigned URLs to prevent unauthorized file sharing.
