Micro-SaaS & Digital Store

Official File Installation & Setup Guide

Included Niche Files

1. `MicroSaaS_Architecture_Guide.pdf`
No-code architecture setup, Stripe billing workflows, and user onboarding flows.

2. `MicroSaaS_Database_Schema.sql`
PostgreSQL/Supabase script for user accounts, subscription tiers, and access tables.

Step-by-Step Installation Instructions

COMPUTER (Windows & macOS)

Installing Files on PC or Mac

1. **Download:** Save files into your web project directory (e.g., `Desktop/MicroSaaS_Project`).
2. **Open Architecture PDF:** Double-click `MicroSaaS_Architecture_Guide.pdf` to review tech stack mapping.
3. **Execute SQL Database Schema:**
   - Log into your **Supabase** or **Postgres** cloud dashboard.
   - Open `MicroSaaS_Database_Schema.sql` in VS Code, Notepad, or TextEdit.
   - Copy all code, paste it into your database *SQL Editor*, and click **Run Query**.
4. **Connect Stripe:** Set up webhooks according to Page 3 of the PDF architecture guide.

MOBILE (iOS & Android)

Installing Files on Mobile

1. **Download:** Tap the download buttons to save `MicroSaaS_Architecture_Guide.pdf` to local file storage.
2. **Read Blueprint:** Open the PDF in Files app or any mobile document viewer.
3. **Execute SQL Schema:**
   - Open `MicroSaaS_Database_Schema.sql` using a text editor app (e.g., Notes, Google Keep, or Acode).
   - Select and copy all text.
   - Paste into your Supabase browser window on mobile and execute the script.
